on Structured Investment and Leverage Products

Q1/2021

Contents

Highlights	2
Quarterly overview	3
Exchange turnover	5
Outstanding volume	6
Number of new listings on exchange	7
Number of exchanged listed products	8
Appendix.	9

1. Highlights

Turnover: Increasing

In the first quarter of 2021, turnover in structured investment and leverage products in note format accounted for 43 bn EUR across reporting markets which is an increase of 23% compared to the previous quarter (35 bn EUR), but a decrease of 13% compared to the equivalent last year quarter Q1 2020 (49.5 bn EUR). Leverage products accounted for a turnover of 25 bn EUR in Q1 2021. On a quarterly basis, their turnover slightly increased by 13% while it decreased by 21% compared on year-on-year basis. Turnover in non-leverage investment products significantly increased by 40% against the preceding quarter while on an annual basis it stayed at broadly the same level.

Outstanding Volume: Growth trend continues

The Q1 2021 figures for the Austrian, Belgian, German¹ and Swiss² markets indicate a total amount of 293.5 bn EUR held in note-based structured products, which represents a moderate increase of 4% compared to last quarter Q4 2020 and a significant growth by 18% on an annual basis.

Number of New Issuances: Decrease on an annual basis

The overall number of new issuances slightly increased during Q1 2021 when measured against the preceding quarter Q4 2020 (1'378'261 versus 1'332'686 products in Q4 2020). The number of investment products which were newly issued increased by 2% on a quarter-by-quarter comparison but decreased by 27% when compared to Q1 2020. For leverage products, the number of new listings rose by 4% compared to the preceding quarter Q4 2020, while listings in this area decreased by 21% on an annual basis.

Total Number of Products: Increasing figures

Markets of contributing EUSIPA member associations reported 1'768'264 products as open (non-matured) in Q1 2021, which represents an increase of 5% compared to the preceding quarter Q4 2020 and of +16% on an annual basis. In the leverage products segment, the total number of products rose by 8% when compared against the previous quarter Q4 2020 and by 18% on an annual basis.

¹ The German figures are sourced in from the 15 issuers assembled under the roof of Deutsche Derivate Verband (DDV) and entail assets from the sales of listed note-based structured retail products to customers based in Germany. The 15 issuers cover more than 90% of the German market in these products.

² The Swiss figures are sourced in from the Swiss National Bank and represent all assets in listed note-based structured retail products held in Swiss depots of issuers domiciled in Switzerland. The figures include therefore, to a small extent, also assets from product sales of these issuers outside Switzerland. The Swiss National Bank has extended the circle of the reportable institutions for the statistics of the securities held in bank's client deposits. The survey group consists now also of institutions with a special field of business. In case of such institutions with a special field of business and especially for deposits which are stored centrally there are only securities included that are not already stored at another reportable bank and reported by it.
